Investment objective

Vanguard Cash Reserves Federal Money Market Fund seeks to provide current income while maintaining liquidity and a stable share price of $1.

Investment strategy

The fund invests primarily in high-quality, short-term money market instruments. Under normal circumstances, at least 80% of the fund’s assets are invested in securities issued by the U.S. government and its agencies and instrumentalities, including repurchase agreements that are collateralized solely by U.S. government securities or cash. Although these securities are high-quality, some of the securities held by the fund are neither guaranteed by the U.S. Treasury nor supported by the full faith and credit of the U.S. government. To be considered high quality, a security must be determined by Vanguard to present minimal credit risk based in part on a consideration of maturity, portfolio diversification, portfolio liquidity, and credit quality. The fund invests more than 25% of its assets in securities issued by companies in the financial services industry, which includes, without limitation, securities issued by certain government-sponsored enterprises. The fund maintains a dollar-weighted average maturity of 60 days or less and a dollar-weighted average life of 120 days or less.

Government money market funds are required to invest at least 99.5% of their total assets in cash, U.S. government securities, and/or repurchase agreements that are collateralized solely by U.S. government securities or cash (collectively, government securities). The fund generally invests 100% of its assets in U.S. government securities and therefore will satisfy the 99.5% requirement for designation as a government money market fund.

Note: Effective September 29, 2020, the fund changed its name from Vanguard Prime Money Market Fund to Vanguard Cash Reserves Federal Money Market Fund, and revised its strategy to focus almost exclusively on investments in cash, U.S. government securities, and/or repurchase agreements that are collateralized solely by cash or U.S. government securities. The fund is now designated as a government money market fund. Information for the periods prior to September 29, 2020 is based on the investment strategy utilized by the fund prior to September 29, 2020, under the name Vanguard Prime Money Market Fund.

The performance data shown represent past performance, which is not a guarantee of future results. Investment returns will fluctuate. Current performance may be lower or higher than the performance data cited. For performance data current to the most recent month-end, visit our website at vanguard.com/performance. The performance of an index is not an exact representation of any particular investment, as you cannot invest directly in an index.

Figures for periods of less than one year are cumulative returns. All other figures represent average annual returns. Performance figures include the reinvestment of all dividends and any capital gains distributions. All returns are net of expenses.

Seven-day current yield net of expenses. The yield quotation more closely reflects the current earnings of the fund than the total return quotation.

Distribution by issuer–bonds

- Repurchase Agreements: 41.8%
- U.S. Govt. Obligations: 37.0%
- U.S. Treasury Bills: 21.2%
- Bankers Acceptances: 0.0%
- Certificates of Deposit: 0.0%
- U.S. Commercial Paper: 0.0%
- Yankee/Foreign: 0.0%
- Other: 0.0%

Important Note: This fund may earn income from investments in repurchase agreements and certain other securities that are generally subject to state and local taxes.
Plain talk about risk

The fund is designed for investors with a low tolerance for risk; however, the fund’s performance could be hurt by:

**Income risk:** The chance that the fund’s income will decline because of falling interest rates. Because the fund’s income is based on short-term interest rates—which can fluctuate significantly over short periods—income risk is expected to be high.

**Manager risk:** The chance that poor security selection will cause the fund to underperform relevant benchmarks or other funds with a similar investment objective.

**Credit risk:** The chance that the issuer of a security will fail to pay interest or principal in a timely manner or that negative perceptions of the issuer’s ability to make such payments will cause the price of that security to decline. Credit risk should be very low for the fund because it invests primarily in securities that are considered to be of high quality.

**Industry concentration risk:** The chance that there will be overall problems affecting a particular industry. Because the fund will invest more than 25% of its assets in securities of companies in the financial services industry, which includes securities issued by certain government-sponsored enterprises, the fund’s performance will depend to a greater extent on the overall condition of that industry.

You could lose money by investing in the fund. Although the fund seeks to preserve the value of your investment at $1.00 per share, it cannot guarantee it will do so. An investment in the fund is not a bank account and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund’s sponsor is not required to reimburse the fund for losses, and you should not expect that the sponsor will provide financial support to the fund at any time, including during periods of market stress.
