Notes to Financial Statements

Vanguard Fiduciary Trust Company Russell 2000 Growth Index Trust (the "Trust") was established by a Declaration of Trust dated October 1, 2003, and most recently amended effective June 1, 2023, to provide a collective investment trust for eligible tax-exempt entities (see "Federal Income Taxes" below).

- **A.** The following significant accounting policies are consistently followed by the Trust in the preparation of its financial statements. Such policies are in accordance with the Declaration of Trust and in conformity with generally accepted accounting principles for U.S. investment companies.
- 1. Security Valuation: Securities are valued as of the close of trading on the New York Stock Exchange (generally 4 p.m., Eastern time) on the valuation date. Equity securities are valued at the latest quoted sales prices or official closing prices taken from the primary market in which each security trades; such securities not traded on the valuation date are valued at the mean of the latest quoted bid and asked prices. Securities for which market quotations are not readily available, or whose values have been affected by events occurring before the Trust's pricing time but after the close of the securities' primary markets, are valued by methods deemed by the Vanguard Fiduciary Trust Company (the "Trustee") to represent fair value. Investments in Vanguard Market Liquidity Fund are valued at that fund's net asset value.
- 2. Futures Contracts: The Trust uses index futures contracts to a limited extent, with the objectives of maintaining full exposure to the stock market, maintaining liquidity, and minimizing transaction costs. The Trust may purchase futures contracts to immediately invest incoming cash in the market, or sell futures in response to cash outflows, thereby simulating a fully invested position in the underlying index while maintaining a cash balance for liquidity. The primary risks associated with the use of futures contracts are imperfect correlation between changes in market values of stocks held by the Trust and the prices of futures contracts, and the possibility of an illiquid market. Counterparty risk involving futures is mitigated because a regulated clearinghouse is the counterparty instead of the clearing broker. To further mitigate counterparty risk, the Trust trades futures contracts on an exchange, monitors the financial strength of its clearing brokers and clearinghouse, and has entered into clearing agreements with its clearing brokers. The clearinghouse imposes initial margin requirements to secure the Trust's performance and requires daily settlement of variation margin representing changes in the market value of each contract. Any securities pledged as initial margin for open contracts are noted in the Schedule of Investments.

Futures contracts are valued at their quoted daily settlement prices. The notional amounts of the contracts are not recorded in the Statement of Assets and Liabilities. Fluctuations in the value of the contracts are recorded in the Statement of Assets and Liabilities as an asset (liability) and in the Statement of Operations as unrealized appreciation (depreciation) until the contracts are closed, when they are recorded as realized gains (losses) on futures contracts.

During the year ended March 31, 2025, the Trust's average investments in long and short futures contracts represented less than 1% of net assets, based on the average of the notional amounts at each quarter-end during the period.

3. Swap Contracts: The Trust has entered into equity swap contracts to earn the total return on selected reference stocks or indexes in the Trust's target index. Under the terms of the swaps, the Trust receives the total return on the referenced stock (i.e., receiving the increase or paying the decrease in value of the selected reference stock and receiving the equivalent of any dividends in respect of the selected referenced stock) over a specified period of time, applied to a notional amount that represents the value of a designated number of shares of the selected reference stock at the beginning of the equity swap contract. The Trust also pays a floating rate that is based on short-term interest rates, applied to the notional amount. At the same time, the Trust generally invests an amount approximating the notional amount of the swap in high-quality temporary cash investments.

A risk associated with all types of swaps is the possibility that a counterparty may default on its obligation to pay net amounts due to the Trust. The Trust's maximum amount subject to counterparty risk is the unrealized appreciation on the swap contract. The Trust mitigates its counterparty risk by entering into swaps only with a diverse group of prequalified counterparties, monitoring their financial strength, entering into master netting arrangements with its counterparties, and requiring its counterparties to transfer collateral as security for their performance. In the absence of a default, the collateral pledged or received by the Trust cannot be repledged, resold, or rehypothecated. In the event of a counterparty's default (including bankruptcy), the Trust may terminate any swap contracts with that counterparty, determine the net amount owed by either party in accordance with its master netting arrangements, and sell or retain any collateral held up to the net amount owed to the Trust under the master netting arrangements. The swap contracts contain provisions whereby a counterparty may terminate open contracts if the Trust's net assets decline below a certain level, triggering a payment by the Trust if the Trust is in a net liability position at the time of the termination. The payment amount would be reduced by any collateral the Trust has pledged. Any securities pledged as collateral for open contracts are noted in the Schedule of Investments. The value of collateral received or pledged is compared daily to the value of the swap contracts exposure with each counterparty, and any difference, if in excess of a specified minimum transfer amount, is adjusted and settled within two business days.

The notional amounts of swap contracts are not recorded in the Statement of Assets and Liabilities. Swaps are valued daily based on market quotations received from independent pricing services or recognized dealers and the change in value is recorded in the Statement of Assets and Liabilities as an asset (liability) and in the Statement of Operations as unrealized appreciation (depreciation) until periodic payments are made or the termination of the swap, at which time realized gain (loss) is recorded.

During the year ended March 31, 2025, the Trust's average amounts of investments in total return swaps represented less than 1% of net assets, based on the average of notional amounts at each quarter-end during the period.

4. Federal Income Taxes: The Trust is qualified for the collective investment of funds of tax-exempt pension, stock bonus, and profit-sharing trusts under Section 401(a) of the Internal Revenue Code (the "Code"), governmental plans or units under Section 818(a)(6) of the Code, and church retirement income accounts under Section 403(b)(9) of the Code, and is exempt from federal income taxation under Section 501(a) of the Code. Net investment income and realized net gains are not required to be distributed to unitholders and are instead retained by the Trust. Management has reviewed the tax-exempt status of the Trust and has concluded that no provision for federal income tax is required in the financial statements.

- 5. Securities Lending: To earn additional income, the Trust lends its securities to qualified institutional borrowers. Security loans are subject to termination by the Trust at any time, and are required to be secured at all times by collateral in an amount at least equal to the market value of securities loaned. Daily market fluctuations could cause the value of loaned securities to be more or less than the value of the collateral received. When this occurs, the collateral is adjusted and settled on the next business day. The Trust further mitigates its counterparty risk by entering into securities lending transactions only with a diverse group of prequalified counterparties, monitoring their financial strength, and entering into master securities lending agreements with its counterparties. The master securities lending agreements provide that, in the event of a counterparty's default (including bankruptcy), the Trust may terminate any loans with that borrower, determine the net amount owed, and sell or retain the collateral up to the net amount owed to the Trust; however, such actions may be subject to legal proceedings. While collateral mitigates counterparty risk, in the event of a default, the Trust may experience delays and costs in recovering the securities loaned. The Trust invests cash collateral received in Vanguard Market Liquidity Fund, and records a liability in the Statement of Assets and Liabilities for the return of the collateral, during the period the securities are on loan. Collateral investments in Vanguard Market Liquidity Fund are subject to market appreciation or depreciation. Securities lending income represents fees charged to borrowers plus income earned on invested cash collateral, less expenses associated with the loan. During the term of the loan, the Trust is entitled to all distributions made on or in respect of the loaned securities.
- 6. Other: Dividend income is recorded on the ex-dividend date. Non-cash dividends included in income, if any, are recorded at the fair value of the securities received. Interest income includes income distributions received from Vanguard Market Liquidity Fund and is accrued daily. Security transactions are accounted for on the date securities are bought or sold. Costs used to determine realized gains (losses) on the sale of investment securities are based on the average cost of the securities sold.
- **B.** Vanguard Fiduciary Trust Company is Trustee and administrator for the Trust. Unitholders pay directly to the Trustee an advisory fee based upon the value of their units in the Trust.

The Trustee furnishes corporate management and administrative services to the Trust. The Trustee may charge certain expenses, including custodian fees and auditing fees, to the Trust. The Trustee has agreed to limit the expenses of the Trust to an annual rate of 0.01% of the Trust's average net assets. The expense limitation had no effect for the fiscal year ended March 31, 2025.

The Trustee retains 5% of the total of fees charged to the borrower and income from the investment of cash collateral from securities lending transactions.

- **C.** The Trust's custodian bank has agreed to reduce its fees when the Trust maintains cash on deposit in the non-interest-bearing custody account. For the year ended March 31, 2025, custodian fee offset arrangements reduced the Trust's expenses by \$8,000 (an annual rate of less than 0.001% of average net assets).
- **D.** Various inputs may be used to determine the value of the Trust's investments and derivatives. These inputs are summarized in three broad levels for financial statement purposes. The inputs or methodologies used to value securities are not necessarily an indication of the risk associated with investing in those securities.
- Level 1—Quoted prices in active markets for identical securities.
- Level 2—Other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).
- **Level 3**—Significant unobservable inputs (including the Trust's own assumptions used to determine the fair value of investments). Any investments and derivatives valued with significant unobservable inputs are noted on the Schedule of Investments.

The following table summarizes the market value of the Trust's investments and derivatives as of March 31, 2025, based on the inputs used to value them:

	Level 1 (\$000)	Level 2 (\$000)	Level 3 (\$000)	Total (\$000)
Investments				
Assets				
Common Stocks	1,153,098	3	_	1,153,101
Rights	_	_	92	92
Warrants	_	4	_	4
Temporary Cash Investments	55,295	_	_	55,295
Total	1,208,393	7	92	1,208,492
Derivative Financial Instruments				
Liabilities				
Futures Contracts ¹	(30)	_	_	(30)
Swap Contracts	_	(104)	_	(104)
Total	(30)	(104)	_	(134)

- 1 Includes cumulative appreciation (depreciation) on futures contracts and centrally cleared swaps, if any, as reported in the Schedule of Investments. Only current day's variation margin is reported within the Statement of Assets and Liabilities.
- E. During the year ended March 31, 2025, the Trust purchased \$763,336,000 of investment securities and sold \$909,884,000 of investment securities, other than temporary cash investments. In addition, the Trust purchased and sold investment securities of \$0 and \$732,829,000, respectively, in connection with in-kind purchases and redemptions of the Trust's units. Detailed information on security transactions can be obtained from the Trustee on request.

F. Units issued and redeemed were:

	Year Ended	Year Ended March 31,	
	2025 Units (000)	2024 Units (000)	
Issued	274	245	
Redeemed	(1,765)	(374)	
Net Increase (Decrease) in Units Outstanding	(1,491)	(129)	

G. Significant market disruptions, such as those caused by pandemics, natural or environmental disasters, war, acts of terrorism, political or regulatory conditions, or other events, can adversely affect local and global markets and normal market operations. Any such disruptions could have an adverse impact on the value of the Trust's investments and Trust performance.

To the extent the Trust's investment portfolio reflects concentration in a particular market, industry, sector, country or asset class, the Trust may be adversely affected by the performance of these concentrations and may be subject to increased price volatility and other risks.

The use of derivatives may expose the Trust to various risks. Derivatives can be highly volatile, and any initial investment is generally small relative to the notional amount so that transactions may be leveraged in terms of market exposure. A relatively small market movement may have a potentially larger impact on derivatives than on standard securities. Leveraged derivatives positions can, therefore, increase volatility. Additional information regarding the Trust's use of derivative(s) and the specific risks associated is described under significant accounting policies.

At March 31, 2025, two unitholders were each a record or beneficial owner of at least 25% or more of the Trust's net assets, with a combined ownership of 100%. If any of these unitholders were to redeem their investment in the Trust, the redemption might result in an increase in the Trust's expense ratio or cause the Trust to incur higher transaction costs.

H. Management has determined that no events or transactions occurred through May 23, 2025, the date the financial statements were made available to be issued, that would require recognition or disclosure in these financial statements.

Report of Independent Auditors

To the Board of Directors of Vanguard Fiduciary Trust Company

Opinion

We have audited the accompanying financial statements of Vanguard Fiduciary Trust Company Russell 2000 Growth Index Trust (the "Trust"), which comprise the statement of assets and liabilities, including the schedule of investments, as of March 31, 2025, the related statement of operations for the year ended March 31, 2025, the statement of changes in net assets for each of the two years in the period ended March 31, 2025, including the related notes, and the financial highlights for each of the five years in the period ended March 31, 2025 (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Trust as of March 31, 2025, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period ended March 31, 2025 and the financial highlights for each of the five years in the period ended March 31, 2025 in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (US GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Trust and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Trust's ability to continue as a going concern for one year after the date the financial statements are available to be issued.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with US GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

PricewaterhouseCoopers LLP, Two Commerce Square, Suite 1800, 2001 Market Street, Philadelphia, PA 19103-7042 T: (267) 330 3000, F: (267) 330 3300, www.pwc.com/us

In performing an audit in accordance with US GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due
 to fraud or error, and design and perform audit procedures responsive to those risks. Such
 procedures include examining, on a test basis, evidence regarding the amounts and
 disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of expressing an
 opinion on the effectiveness of the Trust's internal control. Accordingly, no such opinion is
 expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the
 aggregate, that raise substantial doubt about the Trust's ability to continue as a going concern
 for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.
