Investment objective

The fund seeks to provide income consistent with the preservation of principal.

Investment strategy

The Portfolio invests 100% of its assets in Vanguard Short-Term Reserves Account, through which the Portfolio indirectly owns funding agreements issued by one or more insurance companies, synthetic investment contracts, as well as shares of Vanguard Federal Money Market Fund. Funding agreements are interest-bearing contracts that are structured to preserve principal and accumulate interest earnings over the life of the investment. These agreements generally pay interest at a fixed rate and have fixed maturity dates that normally range from 2 to 5 years. Investments in new funding agreements are based upon available liquidity in the Portfolio and the competitiveness of the interest rates offered by eligible high-quality issuers and depend on market conditions and trends. Under New York State law, the Trust may invest only in those funding agreements issued by life insurance companies whose general obligations are assigned the highest or second highest rating by two nationally recognized rating services, or by one such rating service in the event that only one such rating service assigns a rating to such obligations, subject to a 50 million limit per issuer. The minimum amount of a funding agreement is usually about 5 million. After a funding agreement is purchased, additional cash contributions will be used to purchase shares of the Federal Money Market Fund until there is enough cash to purchase another funding agreement. There is a limited universe of high-quality insurance companies and other issuers that issue investments eligible for purchase by the Short-Term Reserves Account. Within this constraint, Vanguard seeks to diversify among eligible issuers and investments. If necessary, the Short-Term Reserves Account may invest all, or a large portion, of its assets in Vanguard Federal Money Market Fund to limit its exposure to any single issuer or to meet normal liquidity needs.

Plain talk about risk

A stable value fund investment does not constitute a balanced investment program. Although highly rated investments are selected for the fund, the contracts held by the fund are not guaranteed by the U.S. government, Vanguard, the trustee, or your retirement plan. The fund will seek to invest with a diversified selection of contract issuers. A stable value fund is designed as a low-risk investment but you could still lose money by investing in it. The primary risks of investing in the fund are:

Income Risk: The possibility that a fund's income will decline as a result of falling interest rates. Investments are generally made for terms of at least two to five years, on average, producing a rate of fund income that will be higher than that earned on shorter-maturity money market funds. But because it is influenced by average interest rates over a period of several years, the fund's income yield may remain above or stay below current market yields during some time periods. Income risk will be moderately high for the fund.

Credit Risk: The chance that an issuer will fail to pay interest and principal in a timely manner. Credit risk should be low for the fund because it invests mainly in investments that are considered high-quality.

Manager Risk: The chance that poor security selection will cause the fund to underperform relevant benchmarks or other funds with a similar investment objective.

Derivatives Risk: The chance that investments in derivatives may involve risks different from, and possibly greater than, those of investments in the underlying securities, assets, or market indexes.

Note: An investment in the fund is neither insured nor guaranteed by the U.S. government. There is no assurance that the fund will be able to maintain a stable net asset value of a share, and it is possible to lose money by investing in the fund.

The fund is not a mutual fund. It is a separately managed investment portfolio available only to plan participants. For more information about Vanguard funds or to obtain a prospectus on the fund's operations, expenses, fees and investment policies, see below for which situation is right for you.
