**Investment objective**

Vanguard Short-Term Bond Index Fund seeks to track the performance of a market-weighted bond index with a short-term dollar-weighted average maturity.

**Investment strategy**

The fund employs an indexing investment approach designed to track the performance of the Bloomberg Barclays 1–5 Year U.S. Government/Credit Float Adjusted Bond Index. This index includes all medium and larger issues of U.S. government, investment-grade corporate, and investment-grade international dollar-denominated bonds that have maturities of between 1 and 5 years and are publicly issued. The fund invests by sampling the index, meaning that it holds a range of securities that, in the aggregate, approximates the full index in terms of key risk factors and other characteristics. All of the fund’s investments will be selected through the sampling process, and at least 80% of the fund’s assets will be invested in bonds held in the index. Under normal circumstances, the fund’s dollar-weighted average maturity is not expected to exceed 3 years.

  - Periods ended December 31, 2019
    - Quarter: Year to date, One year, Three years, Five years, Since inception
    - Fund: 0.37%, 4.88%, 4.88%, 2.47%, 1.97%, 1.68%
    - Benchmark: 0.50%, 5.01%, 5.01%, 2.54%, 2.03%, —

The performance data shown represent past performance, which is not a guarantee of future results. Investment returns and principal value will fluctuate, so investors’ shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data cited. For performance data current to the most recent month-end, visit our website at [vanguard.com/performance](http://vanguard.com/performance).

Figures for periods of less than one year are cumulative returns. All other figures represent average annual returns. Performance figures include the reinvestment of all dividends and any capital gains distributions. All returns are net of expenses.

**Distribution by issuer—bonds**

- Treasury/Agency: 67.9%
- Industrial: 13.6%
- Finance: 10.6%
- Foreign: 6.7%
- Utilities: 1.1%
- Other: 0.1%
- Asset-Backed: 0.0%
- Commercial Mortgage-Backed: 0.0%
- Government Mortgage-Backed: 0.0%

* Partial return since fund started, September 27, 2011.

Spl BloomBarc US1-5YrGov/Cr FlAdjIx: Bloomberg Barclays U.S. 1–5 Year Government/Credit Bond Index through December 31, 2009; Bloomberg Barclays U.S. 1–5 Year Government/Credit Float Adjusted Index thereafter.
Plain talk about risk

The fund is designed for investors with a low tolerance for risk; however, the fund’s performance could be hurt by:

**Interest rate risk:** The chance that bond prices will decline because of rising interest rates. Interest rate risk should be low for the fund because it invests primarily in short-term bonds, whose prices are much less sensitive to interest rate changes than are the prices of long-term bonds.

**Income risk:** The chance that the fund’s income will decline because of falling interest rates.

**Credit risk:** The chance that a bond issuer will fail to pay interest or principal in a timely manner or that negative perceptions of the issuer’s ability to make such payments will cause the price of that bond to decline. Credit risk should be low for the fund because it purchases only bonds that are of investment-grade quality.

**Index sampling risk:** The chance that the securities selected for the fund, in the aggregate, will not provide investment performance matching that of the index. Index sampling risk for the fund should be low.
