**Investment objective**

Vanguard Growth Index Fund seeks to track the performance of a benchmark index that measures the investment return of large-capitalization growth stocks.

**Investment strategy**

The fund employs an indexing investment approach designed to track the performance of the CRSP US Large Cap Growth Index, a broadly diversified index predominantly made up of growth stocks of large U.S. companies. The fund attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

The fund may become nondiversified, as defined under the Investment Company Act of 1940, solely as a result of a change in relative market capitalization or index weighting of one or more constituents of the index.

The performance data shown represent past performance, which is not a guarantee of future results. Investment returns and principal value will fluctuate, so investors’ shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data cited. For performance data current to the most recent month-end, visit our website at vanguard.com/performance.

Figures for periods of less than one year are cumulative returns. All other figures represent average annual returns. Performance figures include the reinvestment of all dividends and any capital gains distributions. All returns are net of expenses.

**Top sector holdings—stocks**

- Technology: 40.9%
- Consumer Services: 19.4%
- Financials: 12.8%
- Industrials: 11.5%
- Health Care: 8.3%
- Consumer Goods: 4.7%
- Basic Materials: 1.4%
- Oil & Gas: 0.6%
- Telecommunications: 0.3%
- Utilities: 0.1%

Sector categories are based on the Industry Classification Benchmark ("ICB"), except for the “Other” category (if applicable), which includes securities that have not been provided an ICB classification as of the effective reporting period.

Plain talk about risk
An investment in the fund could lose money over short or even long periods. You should expect the fund’s share price and total return to fluctuate within a wide range, like the fluctuations of the overall stock market. In addition, the fund’s performance could be hurt disproportionately by a decline in the prices of just a few stocks. This is because, compared with other mutual funds, the fund invests a greater percentage of assets in the stocks of fewer companies. The fund’s performance could also be hurt by:

Stock market risk: The chance that stock prices overall will decline. Stock markets tend to move in cycles, with periods of rising stock prices and periods of falling stock prices. The fund’s target index may, at times, become focused in stocks of a particular sector, category, or group of companies. Because the fund seeks to track its target index, the fund may underperform the overall stock market.

Investment style risk: The chance that returns from large-capitalization growth stocks will trail returns from the overall stock market. Large-cap stocks tend to go through cycles of doing better—or worse—than other segments of the stock market or the stock market in general. These periods have, in the past, lasted for as long as several years.

Sector risk: The chance that significant problems will affect a particular sector, or that returns from that sector will trail returns from the overall stock market. Daily fluctuations in specific market sectors are often more extreme or volatile than fluctuations in the overall market. Because a significant portion of the fund’s assets are in the information technology sector, the fund’s performance is impacted by the general condition of that sector. Companies in the information technology sector could be affected by, among other things, overall economic conditions, short product cycles, and rapid obsolescence of products, competition, and government regulation. Sector risk is expected to be high for the fund.

Nondiversification risk: Due to a recent index rebalance and in order to closely track the composition of the fund’s target index, more than 25% of the fund’s total assets are invested in issuers representing more than 5% of the fund’s total assets. As a result, the fund is nondiversified under the Investment Company Act of 1940, although it continues to hold more than 300 stocks across a number of sectors. The fund’s performance may be hurt disproportionately by the poor performance of relatively few stocks, or even a single stock, and the fund’s shares may experience significant fluctuations in value.

Note on frequent trading restrictions
Frequent trading policies may apply to those funds offered as investment options within your plan. Please log on to vanguard.com for your employer plans or contact Participant Services at 800-523-1188 for additional information.
